SSLC - St Micheal's Higher Secondary School	94.2%	2020 - 2021

INTERNSHIP

PROJECTS

Well ness Mate

WellnessMate is a dynamic project I spearheaded, aimed at promoting a healthier lifestyle through comprehensive wellness solutions. In a health-conscious world, WellnessMate serves as a robust platform enabling individuals to achieve their wellness goals effectively.

Key Features and Contributions:

Developed WellnessMate to integrate vital health aspects, including body mass index (BMI) tracking and personalized diet recommendations.
Implemented advanced algorithms to provide users with personalized diet plans based on their unique health profiles and objectives.
Enabled informed decision-making by empowering users with actionable insights for a healthier future.
Led the project from conceptualization to execution, ensuring alignment with user needs and market trends.
Collaborated with a multidisciplinary team to leverage diverse expertise in software development, nutrition science, and user experience design.

Technology used : C
